Site Milestones

Milestone	Date(s)
Initial Assessment Completed	Not Yet Achievedsame as A MID and TRW
Proposed to the National Priorities List	Not Yet AchievedNot referre d
Finalized on the National Priorities List	Not ApplicableNot Yet Achiev ed
Remedial Investigation Started	09/19/2014 [order]
Remedy Selected	Not Yet Achieved
Remedial Action Started	Not Yet Achieved
Construction Completed	Not Yet Achieved

Commented [N1]: Site Milestones may be technically correct for how the investigation is expected to proceed. However, many line-items are either not applicable or not representative of how the remediation effort was implemented. The table gives the impression that the investigation into remediation measures began in 2014 and that perhaps no remedial action has been conducted to date. Can the table be reworked consistent with actual milestones (beginning with actions under RWQCB oversight) since they may not align with this conventional list? Alternatively, if this table is to be limited to activities under EPA oversight, could a note be added to indicate that prior activities under RWQCB oversight are not included here?

Cleanup Schedule by Operable Unit

During cleanup, a site can be divided into a number of distinct areas depending on its complexity. These areas, called operable units (OUs), may address geographic areas, specific problems, or areas where a specific action is required. Examples of typical operable units include construction of a groundwater pump and treatment system or construction of a cap over a landfill.

Select an operable unit. After making a selection, press go to filter the table by operable unit.
